

S I S M O

MASTERING MARKET INTELLIGENCE

Welcome to Sismo

Sismo is a graphical tool for market analysis and stock monitoring that will introduce you to a new experience in data visualization.

Designed for the investment professional, Sismo offers quick and easy access to financial information on European equities, with innovative displays of companies' comparative positions on multiple criteria.

Sismo's intuitive interface puts essential information at your fingertips: market data, historical financials, brokers' forecasts and valuation metrics, which you can visualize separately or in any combination.

Daily pre-calculations of indicators ensure fast displays to create a seamless experience, embracing large historical and prospective data and offering instant visualizations of complex user queries.

Explore equity markets in all possible ways

Move upward from a single stock or downward from index and sector components, favorites lists or any possible universe of securities.

Browse through rankings and comparisons on single and multiple criteria and switch between alternative visualizations to get an in-depth grasp of all market dimensions, at any time and over any period of time.

Zoom in and out of displays, look up peers, explore investment ideas, check out security descriptions and switch between multiple-stock comparisons and time-series visualizations to capture market dynamics.

Work in parallel with different groups of securities and save your analyses with all parameters at any time.

Highlight the stocks emerging from multiple analyses based on your own scoring system. Adjust, expand and narrow down your search.

Iterate until you get the investment ideas that best fit your criteria or gain the comprehensive market understanding you are looking for.

You have now entered the Sismo experience. We are very happy to welcome you.

About Sismo

Sismo is a graphical tool for market analysis and stock monitoring developed by Valphi.
